

# #46 - "I'm comin', Beany-boy!"

created by Nancy Snyder

Nov 11, 2007

A large grid for a Paint-by-Number puzzle. The top portion of the grid contains numerical clues for the rows and columns. The grid itself is a 28x32 grid. The top row has 32 columns. The first 16 columns have vertical clues, and the last 16 columns have horizontal clues. The clues are numbers, some in different colors (green, blue, red, black) corresponding to the puzzle's theme. The grid is mostly empty, with some numbers already filled in, likely representing the completed puzzle or a partially solved state.
